PORTABLE APPLIANCES USE AND CARE HINTS

Each appliance manufacturer publishes a use and care booklet. Read carefully before using an appliance for the first time; keep handy for repeated referrals.

When disconnecting any portable appliance, turn off controls, remove plug from wall outlet, then from appliance itself.

A good rule to remember: never connect more than one heating or two motor-driven appliances to an individual circuit.

Motor-driven appliances which are not permanently lubricated require oiling, even though you do not use them every day.

When operating a standard mixer, guide mixture into bowl with a rubber spatula. Never use a metal utensil. To prevent spattering, turn mixer off before raising beaters from bowl.

A blender can supplement a mixer, but should not subsitute for it. Don't use blender to mash potatoes, whip egg whites, mix stiff dough. For best results, fill blender container with enough liquid to cover blades. But don't overload.

Clean interior of broiler oven after each use to prevent build up of stains and baked-on foods. Soak removable parts in hot sudsy water.

For a really good cup of coffee, make half (or more) the capacity of your coffee maker. Do not fill past maximum cup level. Clean hard-to-reach spots (stem, spout) with a narrow brush or a piece of pipe cleaner.

When cooking in an electric fry pan, follow the recommended time and temperature settings initially, then modify to personal taste. If browning or simmering small quantities of food, lower temperature setting from 25 to 50 degrees.

Griddles are high wattage appliances. For this reason, **do not** use an extension or drop cord. Grill food in minimum suggested time and test for doneness. You may wish to cook longer.

Warming trays should **never** be immersed for cleaning or water allowed to seep under glass top.

Before using a new electric knife, separates blades and wash off light oil coating with a soap-filled steel wool pad. Do not cut down on bones plates or forks as this will dull blades. Guide blades through food; avoid using a back-and-forth sawing action.

In toasting bread, select a slightly darker setting for whole wheat slices and frozen waffles. Never try to remove bread from toaster using a knife or other metal object.
